

## **AbbVie New Zealand – Local response to COVID-19**

**19<sup>th</sup> March 2020**

Given the high risk to public health posed by COVID-19 and the increasing burden on our healthcare system, AbbVie has implemented measures to protect the health and safety of our New Zealand employees, our customers and the local community.

In addition to cancelling all domestic and international travel, we have temporarily ceased visits by AbbVie representatives to healthcare sites. Where these visits are essential, we will work directly with those concerned to ensure the safety of all involved.

We will be connecting virtually with healthcare providers to provide information and support about our medicines until further notice.

Our commitment during this difficult time is to protect health and welfare, mitigate the spread of the virus and ensure an uninterrupted supply of our medicines to patients.

We believe taking these actions will best support all those who are currently at the frontline of this pandemic and the patients we serve.

If you have any questions regarding our medicines or any of our practices, please email [medinfoanz@abbvie.com](mailto:medinfoanz@abbvie.com) or 0800 900 030.
